Contents

Research Papers

Analytical solution of transient radial air flow to an extraction well
W. Guo 1

Linking space–time scale in hydrological modelling with respect to global climate change Part 1. Models, model properties, and experimental design
D. Panagoulia and G. Dimou 15

Linking space–time scale in hydrological modelling with respect to global climate change Part 2. Hydrological response for alternative climates
D. Panagoulia and G. Dimou 38

A new approach to a hydrochemical study of groundwater flow
K.M. Ochsenkühn, J. Kontoyannakos and M. Ochsenkühn-Petropulu 64

Response of a partially penetrating well in a heterogeneous aquifer: integrated well-face flux vs. uniform well-face flux boundary conditions
N.C. Ruud and Z.J. Kabala 76

Using higher probability weighted moments for flood frequency analysis
Q.J. Wang 95

A relative-flux-correction scheme for analyzing three dimensional data of a tile-drained agricultural plot
B.P. Mohanty and R.S. Kanwar 107

A numerical study on gravitational instabilities of dense aqueous phase plumes in three-dimensional porous media
H.H. Liu and J.H. Dane 126

Comparative analysis of laboratory and field tracer tests for investigating preferential flow and transport in mining waste rock
N. Eriksson, A. Gupta and G. Destouni 143

Numerical solution of the differential equation for moving front dispersion
O.D.L. Strack and M.D. Fairbrother 164

Self-determined probability-weighted moments method and its application to various distributions
T. Haktanir 180

Theory of single-well tests in acute fracture–wellbore systems
A. Aydin 201

Microdepression-focused recharge in a coastal wetland, La Plata, Argentina
W.S. Logan and D.L. Rudolph 221

Derivation of low flow distribution functions using recession curves
L. Gottschalk, L.M. Tallaksen and G. Perzyna 239

Mixed convection processes below a saline disposal basin
C.T. Simmons and K.A. Narayan 263

Low temperature diagenetic–metamorphic and magmatic contributions of external CO_2 gas to a shallow ground water system
A.L. Mayo and A.B. Muller 286

Atmospheric inputs and catchment solute fluxes for major ions in five Welsh upland catchments
B. Reynolds, D. Fowler, R.I. Smith and J.R. Hall 305

Estimation of cleanup time for continuous and pulsed soil vapor extraction
V. Kaleris and J. Croisé 330

Concomitants of the Hershfield factor
M.A.J. van Montfort 357

Storm resampling for uncertainity analysis of a multiple-storm unit hydrograph
B. Zhao, Y.-K. Tung, K.-C. Yeh and J.-C. Yang 366
